CTIME – Frontier Optional Feature

OVERVIEW

The Frontier CTIME optional feature allows Frontier to collect badge transactions for time reporting purposes, providing:

Cost-effectiveness

CTIME is an affordable option supporting the basic pairing of “In” and “Out” badge transactions collected for designated badgeholders at designated card readers – an ideal solution for verifying contractor time.

Flexibility

With CTIME, doors may be assigned as collection “In” or collection “Out” readers. When a designated badgeholder swipes at a designated collection reader, Frontier controls access as well as stores the badge transaction for reporting purposes.

Convenience

Additional reports are available to support the CTIME feature. The CTIME reports allow for selection on: date/time, department, badge number, employee number, door and company. The reports display the “In” and “Out” times and/or the total calculated times for the specified report criteria.

REQUIREMENTS

Frontier

- Version 5.7.1 or greater
- CTIME License

Matrix Systems maintains a policy of continuous product improvement. Specifications are subject to change at any time.
