Extended Field Edit Logging – Frontier Optional Feature

OVERVIEW

Extended Field Edit Logging is an optional feature used to track edits on the Badge Setup window in Frontier. Extended field edit logging provides:

Dependability

This option keeps track of edits made to a badge record during a single badge update and remembers the changed value from a field, grid, or add/remove list. These edits (the previous and current values) are saved into a table in the database making sure that valuable information is not lost.

Ease of Use

The information stored by the Extended Field Edit Logging feature is easy to view by running the Events Update Details Report from the Report Viewer window in Frontier.

REQUIREMENTS

Frontier

- Version 5.7.1.1 or greater
- Extended field edit logging license
- Version 5.7.2.0 will contain extended field edit logging for other Frontier windows.

Matrix Systems maintains a policy of continuous product improvement. Specifications are subject to change at any time.
