HR Interface – Frontier Optional Feature

OVERVIEW

The HR Interface option allows for employee information from an outside Human Resources program to be loaded into Frontier's Badge Setup window. The HR Interface provides:

Convenience

The HR Interface option offers convenience by importing a file into Frontier containing the badge update information. This badge information can be updated by creating another ASCII comma-delimited file to process into Frontier.

Efficiency

The HR Interface is efficient due to incorporating changes made from an HR system into Frontier. Badge record data does not have to be entered twice into both systems. The following fields can be brought over from the HR Interface into Frontier: Badge Number, Issue Code, Status, Badge Type, Last Name, First Name, Middle Name, Prefix, Suffix, Hire Date, Termination Date, Birthdate, Activation Date, Expiration Date, Taxpayer ID, Employee Number, Job Title, Department Number.

Assurance

The HR Interface uses the badge number or employee number as a match for existing badge records. Any errors that occur while the information is being loaded will appear in the Windows Event Log.

REQUIREMENTS

Frontier

- Version 5.7.1.5 or greater
- MxTasker
- HR Interface License

Other

- ASCII comma-delimited file containing employee information. The text fields in this file should be enclosed with double quotes.

Matrix Systems maintains a policy of continuous product improvement. Specifications are subject to change at any time.
