## ***Prox Encoding – Frontier Optional Feature***

### OVERVIEW

The Frontier Prox Encoding optional feature offers:

#### ***Efficiency***

The Frontier Prox Encoding feature supports the ability to encode proximity cards directly from Frontier's Badge Setup window providing a single point of data entry for encoding proximity cards, which saves time from having to enter a separate software program and reduces the chance data entry errors.

#### ***Ease of Use***

Frontier's intuitive Graphical User Interface (GUI) makes proximity card encoding quick and easy. With one click of a button, a proximity card can be encoded and is ready for immediate use with the Frontier system.

#### ***Flexibility***

The Frontier Prox Encoding feature offers the additional assurance naturally attributed to the use of proximity cards, while providing the flexibility for Frontier users to encode their own card numbers.

### REQUIREMENTS

#### **Hardware**

- HID ProxProgrammer®

#### **Frontier**

- Version 5.5.0 or greater
- Prox Encoding License
