Reader Messaging – Frontier Optional Feature

OVERVIEW

The Frontier Reader Messaging optional feature allows user-defined messages to be entered in Frontier for specified badgeholders. The Reader Messaging feature offers:

Flexibility

The Reader Messaging feature is flexible supporting up to three (3) lines of text with sixteen (16) characters per line to be entered per badgeholder. When the badgeholder uses his/her badge, the message entered in Frontier displays on the LCD (Liquid Crystal Display) of Matrix card readers.

Ease of Use

The Reader Messaging feature is easy to use supporting various configurations including the ability to force a badge to be rejected (although the badge should be accepted) so as to compel the badgeholder to view the message on the Matrix card reader's LCD display. Other Reader Messaging configurations include the number of times the message should display and whether or not to display the message if the badge is rejected.

REQUIREMENTS

Frontier

- Version 5.7.1 or greater
- Reader Messaging License

Matrix Systems maintains a policy of continuous product improvement. Specifications are subject to change at any time.
