

Video Management

Frontier™ Universe software includes drivers that will communicate and interface to a variety of IP Cameras, DVRs, NVRs and CCTV switchers. In addition, the system will allow real-time/recorded video to be displayed in a size-adjustable window on the screen.

Supported DVRs/NVRs

Manufacturers	Live	Recorded	PTZ	Alarm
Dedicated Micros	Yes	No	Yes	No
Infinova	Yes	Yes	Yes	Yes
Milestone	Yes	Yes	Yes	No
OnSSI	Yes	Yes	Yes	No
Pelco	Yes	No	Yes	No
Video Insight	Yes	Yes	Yes	Yes

Matrix knows security.

FrontierTM Video Management

UNIVERSE

Cameras can be viewed graphically or based on device address. Camera commands such as pre-shot and video call-up can be designated as user-defined buttons or macros that execute based on specific conditions. Devices and events in the system can be associated to a camera, and based on the event/alarm the associated camera will auto display and/or do a quick record. Recorded video can be retrieved based on time/date selection and/or based on alarm/event reports.

- Video Manager Interface to manage multiple video systems
- Live and Recorded Video Support
- Camera Control: Pan, Tilt, Zoom
- Global Trigger/Macro Integration allows the video system to link to other systems in Universe (ex: Access Control System, Alarm System, HVAC System, other Video Systems, etc...)
- Hardware Manager Integration allows for programming and configuration of video devices and how they link to other devices in the system.
- Alarm/Event Manager Integration
- Plot Cameras to Graphic Maps for a convenient way to call-up video
- Reports that have associated recorded video can be easily queried and exported to a portable WindowsTM media format.

Supported CCTV Switchers

Manufacturers	Camera Switch	PTZ	Presets	Sequence/Tour
American Dynamics AD20311	Yes	Yes	Yes	Yes
Baxall PY Series	Yes	Yes	No	No
Bosch LTC 8x00	Yes	Yes	Yes	Yes
